 - It Needs Less Coding
 - Big Giants Are Using It
 - Extensive Support Libraries

- Beautiful is better than ugly.
 - Simple is better than complex.
 - Flat is better than nested.
 - Sparse is better than dense.
 - Readability counts.
 - Special cases aren't special enough to break the rules.
 - Errors should never pass silently.
 - There should be one—and preferably only one—obvious way to do it,
 - If the implementation is hard to explain, it's a bad idea.
 - If the implementation is easy to explain, it may be a good idea.
